(54) Title: CHILD SEAT

(57) Abstract: A child seat (1) for use in a ve-  
hicle is designed to be placed on a vehicle seat.  
The child seat (1) comprises a seat part (2) and  
an upright part (3). The upright part (3) com-  
prises a backrest part (10) that is adjustable in  
height relative to the seat part (2) and a head-  
rest part (6) that is adjustable in height rela-  
tive to the seat part (2) and the adjustable back-  
rest part (10). The headrest (6) and the adjust-  
able backrest part (10) are connected to each other,  
so that a height adjustment of the headrest (6)  
leads to a different, preferably smaller height  
adjustment of the adjustable backrest part (10).
